PROFESSIONAL SUMMARY

Detail-oriented QA Automation Engineer with experience in Selenium, Appium, Rest Assured, Java, TestNG, and Cucumber (BDD). Skilled in UI, API, and mobile testing, CI/CD integration using Jenkins, and AWS-based test execution. Experienced in Agile environments with strong expertise in regression, cross-browser, and database testing, along with defect tracking using JIRA.

EDUCATION

- **B.Tech in Computer () — Dr. A.P.J. Abdul Kalam Technical University, Lucknow,India Jul 2020 – Aug 2024**
 - **Intermediate (Science Stream) — SVM, Lucknow, India Jun 2018 – May 2020**
-

SKILLS SUMMARY

Languages: Java, JavaScript, SQL, HTML, CSS

Automation/Frameworks: Selenium WebDriver, TestNG, Cucumber (BDD), Appium, Rest Assured, Testim,POM

Tools: Postman, JIRA, Zephyr, Bugzilla, Git, GitHub, Jenkins (CI/CD), Maven, VS Code, Eclipse, Android Studio

Cloud/DevOps: AWS (Deployment & Test Execution), Kubernetes (Basic)

Testing: Manual Testing (STLC, RTM), Automation Testing (UI, API, Mobile), API Testing, Database Testing, Regression Testing, Cross-Browser Testing, Agile/Scrum

WORK EXPERIENCE

SDET (QA) Software Test Engineer — Future Algorithm Pvt Ltd | Gurugram | Dec 2025 – Present

- Working on UI, API, and mobile automation testing using Selenium, Appium, Rest Assured, Java, TestNG.
- Designing and maintaining automation frameworks using Page Object Model (POM) and CI/CD integration.
- Performing functional, regression, cross-browser, and API testing in Agile/Scrum environments.
- Reporting and tracking defects using JIRA while collaborating with developers for faster issue resolution.
- Worked with Redis and MQTT for real-time data validation and messaging workflow testing.
- Validated backend data flow and device communication across distributed systems and APIs.

QATester—Reacoilife | Noida | Aug 2025–Present

- Designed and executed end-to-end test strategies covering manual, automation, and API testing for web.
 - Developed and maintained automation frameworks using Selenium WebDriver, Java, TestNG, and Cucumber
 - Built and executed API automation scripts using Rest Assured, validating responses, schemas.
 - Integrated automated test suites with CI/CD pipelines (Jenkins) to enable continuous testing and faster releases.
 - Performed cross-browser and cross-device testing, ensuring application stability across different environments.
-

PROJECTS

PCR System — UI Automation (Selenium + Java + TestNG + BDD) | Denso | 10/2025 – Present

- Designed and developed an automation framework using Selenium WebDriver, Java, and TestNG for the PCR.
- Implemented BDD (Cucumber) and automated workflows like request creation, approval process, and validations
- Applied Page Object Model (POM) to improve code reusability and maintainability.
- Integrated automation with CI/CD (Jenkins) and executed test suites on AWS environment.
- Generated detailed test reports and logs to support defect analysis and debugging.

Digimach — API Automation (Rest Assured + Java + TestNG) | 12/2025 – Present

- Built a robust API automation framework using Rest Assured, Java, and TestNG for the Digimach product.
- Automated critical APIs covering functional, validation, and negative test scenarios.
- Implemented data-driven and reusable test methods to improve test coverage and efficiency.
- Validated API responses including status codes, payload structure, and business rules, and ensured high API quality.

Digiplan — Mobile Automation (Appium + Java + TestNG + Android Studio) | Denso | 01/2026 – Present

- Built and maintained mobile automation framework using Appium, Java, and TestNG for the Digiplan application.
- Automated critical workflows such as login, data validation, and end-to-end mobile scenarios.
- Executed tests on Android devices/emulators using Android Studio to ensure cross-device compatibility.
- Designed scalable and reusable automation structure (POM) for efficient test execution.
